ERGOtip Care

For toilet, bath/shower, dressing, wound care etc.

Main uses of ERGOtip Care
ERGOtip Care makes hygiene and bathing routines easy and efficient, while ensuring the comfort of the caregiver.

The stool is multifunctional and can be used for a variety of applications such as bath/shower and toilet, the changing of wound care/dressings, compression stockings, bottoms, etc. It features a compact turning radius, facilitating easy maneuverability of the stool even in confined spaces.

ERGOtip Care promotes comfort
ERGOtip Care has an open back angle – through a unique back offset – enhancing user comfort and minimising shear. The stool offers a forward tilt of 12° and a backward tilt of 124° (through the back opening).

It also comes equipped with convenient comfort rollers, alleviating the need for heavy leg lifting during the changing of compression stockings, wound care, etc.

HMI: 120847
